Leave: 10am      Return: 4pm
Enjoy the beautiful view of the city and the wonderful gardens. Along with all of the famous works of art there will be an exhibition of J.M.W. Turner’s paintings. Extraordinarily inventive and enduringly influential, J. M. W. Turner (1775–1851) produced his most important and famous pictures after the age of sixty, in the last fifteen years of his life. Demonstrating ongoing radicalism of technique and ever-original subject matter, these works show Turner constantly challenging his contemporaries while remaining keenly aware of the market for his art. Bringing together over sixty key oil paintings and watercolors, this major international loan exhibition is the first to focus on the unfettered creativity of Turner’s final years. There is currently a movie called Mr. Turner out about his life.

Other exhibits at the time will include: Zeitgeist: Art in the Germanic World, Between 1800 and 1900 the Germanic world underwent profound intellectual, social, economic, and political changes. The Industrial Revolution, the formal unification of Germany into a nation state, and the invention of psychoanalysis shaped modern life and its representations in art. And much much more..... Lunch on your own, there are picnic areas, a café and restaurant for your choosing as well. Trip includes transportation, museum admission and drivers tip. Book by April 2nd.
