

Bailee's Plate

About Us

Bailee's Plate is a hot lunch provider that specializes in using only all natural products and organic meals made fresh daily for schools with all the nutritional values growing kids need to be healthy. We use the highest quality products and we make sure they stay warm until it is consumed by your child.

Chef Candice, who is also the owner, has a 5 year old and a 3 year old so she knows how important it is to have a healthy and at the same time a delicious meal that the kids will actually eat. She uses the 4 year old as a guinea pig so if she eats it then we put it on the menu so we know the kids will eat it.

Chef Candice understands that not all kids will eat their veggies so to make sure they get their proper nutrition she will blend the veggies into the sauce so the kids don't know they are eating them and instead enjoy the foods that they like, she calls these meals "hidden veggies".

We never use refined sugars at all unless we order something like Hawaiian bread which will have some sugar in it. We basically try to be super clean and healthy without sacrificing the awesome taste of the food which some parents call "5 star" or "our kids eat better than us". Candice has traveled the world and has cooked in Paris and Italy where she perfected her skill to provide top quality food with exceptional taste.

Ordering and Card Fees

The way the ordering works is our IT department will be creating an ordering platform, individual for you where you will be able to order your meals and make any changes to your orders, the link will come from MealManage.

We have a 24h ordering or cancellation window but should there be a last minute change and the system doesn't allow you then please email or text me and I will manually make the change.

The 3rd party payment processor we use charges a credit card fee of 2.99% plus \$0.50 for each transaction. This means every time you add money to your account they will charge you an additional \$0.50 so it's better to add your money one time for a week so you only get one charge of \$0.50 instead of 5 charges of \$0.50 if you add money every day.

For parents with multiple kids, you can add the money to one child and just transfer the credits over to the other child and that will avoid the double processing fee.

You can also Zelle us and you can avoid all the fees. Please Zelle 424-239-4874 and once you do please text the screenshot to that number so they can apply the money to the correct account and so we have a paper trail.

Please note that if you try to contact me and I don't respond within 2 hours to please follow up with me.

Thank you
